

Data Collection and Preprocessing Phase

Date	15 August 2026
Project Title	AI Career Pulse: Decoding the Job Market

Data Collection Plan & Raw Data Sources Identification

Section	Details
Project Overview	AI Career Pulse: Decoding the Job Market uses Tableau to turn the AI job-market dataset into an interactive dashboard that helps students and newcomers understand job demand, salary trends, in-demand skills, experience requirements, locations, industries, and overall career opportunities in AI.
Data Collection Plan	The project relies on the AI job-market dataset supplied for this initiative as its single raw data source. This dataset feeds every downstream step — exploration, quality assessment, preprocessing, and the Tableau analysis that follows.
Raw Data Sources Identified	One raw dataset underpins this project: the supplied AI job-market dataset, comprising 1,500 job records described across 25 fields. Its storage location is the shared Google Drive link listed in the Raw Data Sources table below.

Raw Data Sources

Source Name	Description	Location/URL	Format	Size
Dataset 1 – AI Job-Market Dataset	Raw dataset containing AI job-market records covering job roles, salaries, required skills, experience levels, locations, demand indicators, and related job-market attributes.	https://drive.google.com/file/d/18rWhaGZbwtkOa65T4ti7aUuof2LQQZvq/view?usp=drivesdk	CSV	1,500 records / 25 fields
